NEOCLEOTIDE

Revitalizing Formula
Improved Intestinal Development

NEOCLEOTIDE

**Revitalizing Formula
Improved Intestinal Development**

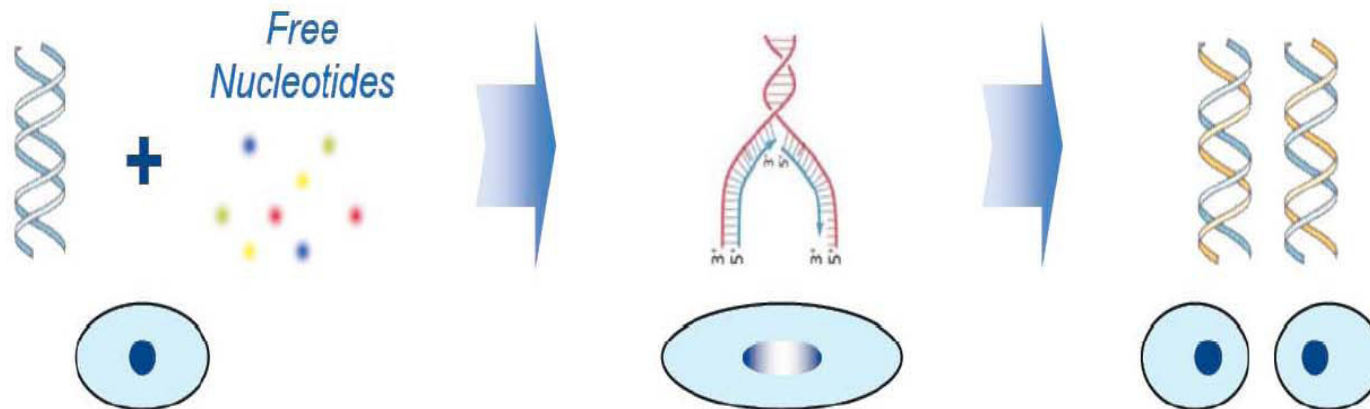

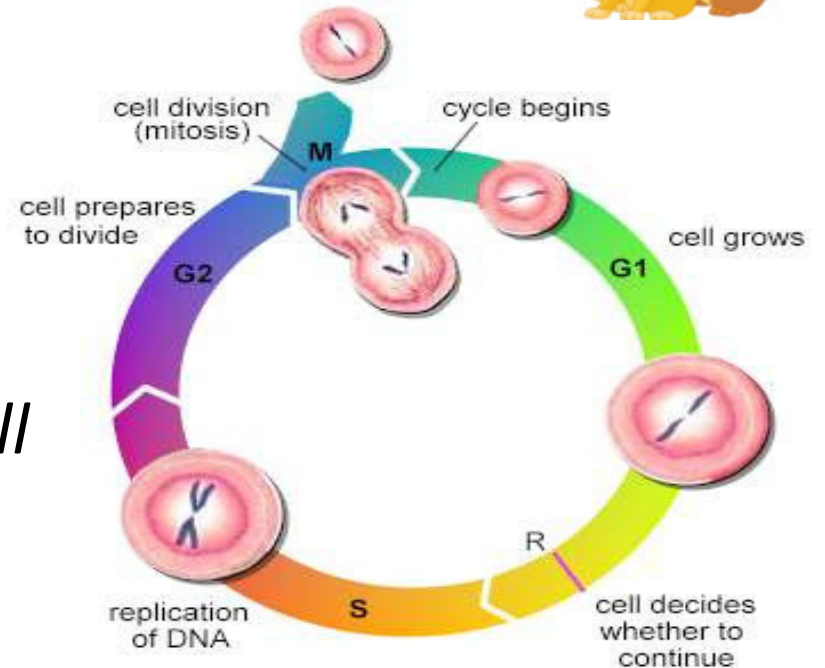

100 Gm POWDER

Composition	Each 1 Gm
Nucleotide	10 mg
MOS (Mannan Oligosaccharide)	110 mg
Saccharomyces boulardii	60 mg
Lactobacillus acidophilus	40 mg
Base	q.s.

Cell Replication

Nucleotides contribute to DNA synthesis as structural units and are therefore a key element in cell replication

Nucleotides and Immune System

- *Nucleotides promote the immune system development, as a result animals develop an earlier mature immune system.*
- *Nucleotides develop the immune system therefore they **reinforce the intestinal mucosa defences.***
- *Nucleotides promote the development of the immune system therefore they could **improve the immune answer** when the animal is **vaccinated.***
- *Nucleotides **reduce post weaning villus atrophy**, as a consequence, **less food is undigested** and the **risk of diarrhoea is reduced.***

Basic advantages of nucleotides in Dogs

- ***Improved immunity***
- ***Improved intestinal development***
- ***Savings on the use of antibiotics***
- ***Stronger animals that are more resistant to different diseases.***
- ***Better answer to vaccinations***

NEOCLEOTIDE

**Revitalizing Formula
Improved Intestinal Development**

Recommended For:

- **Promotion of Small Intestinal growth.**
- **Enhance cellular & humoral immunity.**
- **Protection against diarrhoeal disease.**
- **Effects upon hepatic regeneration.**
- **For uniform growth.**
- **For effective Toxin binding ability.**
- **For better growth & shining coat.**
- **For Better Answer to Vaccination.**

NEOCLEOTIDE

Revitalizing Formula

Improved Intestinal Development

Suggested use

Dogs: **Puppy : 2 - 4 gm daily**

Adult : 4 - 8 gm daily

Cats: All ages: **2 - 4 gm daily**

Sprinkle **NEOCLEOTIDE** as per dose over food.
